The figures in this total overview are reflecting the German market in terms of assets and sales than can be assigned to investors within Germany, independent of the domicile of portfolios (funds) and the domicile of the individual issuing company which is reporting.

**General market overview of investment products and investment focus****Assets and sales for the German sales market in total of providers and fund domiciles**Investment products:

Investment funds under the German Capital Investment Code (Kapitalanlagegesetzbuch, KAGB) and discretionary mandates (individual portfolio management restricted to portfolios that do not constitute investment funds). Investment funds with the legal form of a company (Investment-AG, Investment-KG) are deemed to be funds. Distinction between retail funds and Spezialfonds is made in accordance with the KAGB.

Investment focus:

For retail funds, the focus is based on the BVI fund categorisation scheme; for Spezialfonds, the focus is based on the Deutsche Bundesbank systematics.

Providers:

Fund companies under the KAGB (investment fund management companies, EU management companies and foreign AIF management companies), financial services providers (asset managers) in accordance with the requirements of the BVI's Articles of Association. The group of participants covered in the statistics includes BVI members as well as companies without BVI membership (affiliated group companies and voluntary participants).

Figures reflect net assets and net sales in the amount attributable to private, semi-professional or professional investors in Germany. Details for reference periods may differ from earlier publications if providers report existing portfolios at a later stage.

The information on ETFs for reporting periods since January 2025 is not comparable with data from previous reporting periods due to a change in the framework for data delivery to BVI. The change results from a more precise allocation of assets and sales data to the German market using information from central securities depositories. Due to the methodological improvement, the number of ETFs and issuers has increased.
